Algeria: Potential Areas of Assistance for G*f*D Phase II

Based on the activities completed, the outputs produced and the discussions held in national and regional meetings, the priority areas that may call for assistance from the partners are synthesized for Themes IV, V and VI below. These areas are based on the analysis of the policies and priorities of the participating Arab countries and their needs for financial and technical assistance. The core of that assistance will be to a) further detail the action plans for which there are now simple "outlines", b) prepare feasible projects for each area and c) intensively engage in a capacity building process for institutions involved in the reform process and its' human resources. Capacity building includes institutional reviews leading to reorganization with a view to increasing efficiency; analysis of rules and procedures with a view to eliminating outdated and unnecessary regulations and formulating new ones; strengthening institutional interdependence and coordination; providing proper tools and instruments for task performance; enhancing the use of modern information systems and increasing the motivation, knowledge and skills of staff.

1. Potential Areas of Assistance under Theme V: Under Theme V, and based on the continuous dialogue held among the different actors, three reform projects were formed with draft pilot action plans in the following areas:

    1.1 Providing specialized legal training on economic cases

    1.2 Enforcement of judgments

    1.3 Computerizing case tracking and judicial assignment functions

2. Potential Areas of Assistance under Theme VI: Under Theme VI, a number of potential areas of assistance have been suggested, most of which are common to all the participating Arab countries. The following is a general draft action plan of Algeria:

    2.1 A project consolidating independent institutional procedures of complaints.

    2.2 A project improving proximity in public service delivery to citizens.

    2.3 Improved consultation and participation of citizens and civil society by Arab governments by establishing and strengthening relevant national institutions.

2.4 Activation of existing mixed national councils.

2.5 A project on new specialized national councils. Need for this support has been particularly expressed for the creation of National Council for Statistics in Algeria,

2.6 The need for several Arab countries to improve means of communication by developing and consolidating adequate tools. This would include a center, the Client's Voice, located in the ministry which would be in charge of receiving citizens' complaints and processing them to the concerned institutions:

2.7 Algeria requested the need for the consolidation of the institution of "listening cells' which has been established in social security institutions.

2.8 Public sector performance would be improved significantly by creating the necessary incentives.
